

Company overview

Configurable software for complex workflows.

We offer configurable workflow software for public-sector and regulated programs. Our offered delivery model is senior-led, onshore, and built for customer ownership.

Core capabilities

Licensing & permitting

Application intake, document review, payments, approvals, and renewals.

Programs & case management

Assessments, participant records, observations, and program evidence.

Operations & offline-first inventory

Receiving, purchasing, inventory, and supervised offline synchronization.

Scheduling, testing & monitoring

Schedules, selection rules, results, and follow-up workflows.

Forms, workflow & notifications

Configurable forms, statuses, templates, and notifications.

Data, reporting & dashboards

Data integration, reconciliation, reporting, and export.

Proposed delivery & acceptance

Proposed deliverables; scope, milestones and responsibilities are defined by contract.

01 Discovery & prototype

Workflow maps · Role matrix · Interactive prototype · Decision log

03 UAT & go-live

UAT scripts · Acceptance evidence · Release checklist · Runbooks

02 MVP & beta

Working workflow · Integration contracts · Test results · Migration rehearsal

04 Hypercare & support

Operational review · Transfer package · Responsibility matrix · Maintenance plan

Principal's prior enterprise experience

Prior work by Conduit 512's principal; not Conduit 512 contract past performance.

Paul Gregotski's enterprise background spans banking, healthcare, and legal technology, with Java, TypeScript, payments, identity, event-driven systems, and data pipelines.

Engagement & ownership

- No per-seat licensing; implementation, support, and hosting are agreed separately.
- Configuration before code, with direct access to senior architecture and project-management leads.
- Offered transfer package: source, deployment instructions, runbooks, and data export. Scope and rights are defined by contract.

No contract schedule or cooperative vehicle is represented. Discuss direct engagement where procurement rules permit.

Technologies

Next.js, React & Tailwind · Payload · PWA & offline sync · NestJS & background queues · PostgreSQL, SQL Server & MongoDB · Data pipelines & reporting · Entra ID, Okta & Shibboleth · Azure · Docker & GitHub Actions

Designed to support SAML/OIDC SSO, RBAC and audit logging. No certifications claimed.
